

HAVE YOUR SCREENING ASSISTED WITH **ARTIFICIAL INTELLIGENCE**

The GI Genius™ module allows our doctors to see anything abnormal with a closer look. The GI Genius™ instantly flags potential abnormalities for the gastroenterologist to assess. This Artificial Intelligence can help detect lesions, including precancerous polyps. The GI Genius™ is an extra form of technology that works together with the physician to ensure your colonoscopy is the most efficient and effective. Colonoscopies can save lives, get the best one in New York City.
